installation

# Advanced technology

## Flexible long piping design

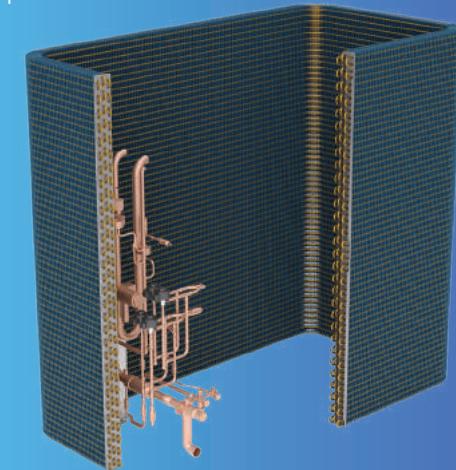

- 1000 m maximum total piping length
- 220 m maximum actual piping length
- 110 m / 90 m maximum height difference between ODU and IDU (ODU higher / IDU higher)
- 30 m maximum height difference between IDU and IDU)

\* For the total piping length between 300 m and 1000 m, and height difference grater than 50 m please contact your supplier

## Optimized condenser coil design

The condenser coil is split in half and refrigerant flow through each part is independently controlled by the separate electronic expansion valve. In this way refrigerant flow and heat exchange area are always optimized to match the indoor units load demand, thus increasing the heat exchange efficiency and improving the system performance.

		Max. length	Pipe in left figure
Single way total pipe length (=total liquid pipe length)		1000 m	$L_1 + L_2 + L_3 + L_4 + L_5 + L_6 + L_7 + L_8 + L_9 + L_{10} + L_{11} + L_{12} + L_{13} + L_{14} + L_{15}$
Single way max. pipe length (max. length between outdoor & indoor) actual length		220 m	$L_1 + L_3 + L_5 + L_7 + L_{14} + L_{15}$
Main pipe actual length (length between first gather pipe & first branch pipe)		130 m	$L_5$
Pipe length after first branch pipe (length between first branch & farthest indoor)		90 m	$L_7 + L_{13} + L_{14}$
The distance between the nearest indoor unit and the farthest indoor		40 m	$L_{13} + L_{14} - L_{12}$
Pipe length among outdoor units (length between first gather pipe & farthest outdoor unit)		10 m	$L_1 + L_3$
Height difference between indoors		18 m	$h_2$
Height difference between outdoors		5 m	$h_1$
Height difference between indoor & outdoor	Indoor below outdoor (between highest outdoor & lowest indoor)	50 m	$H_1$
	Indoor above outdoor (between lowest outdoor & highest indoor)	40 m	$H_2$

# High efficiency

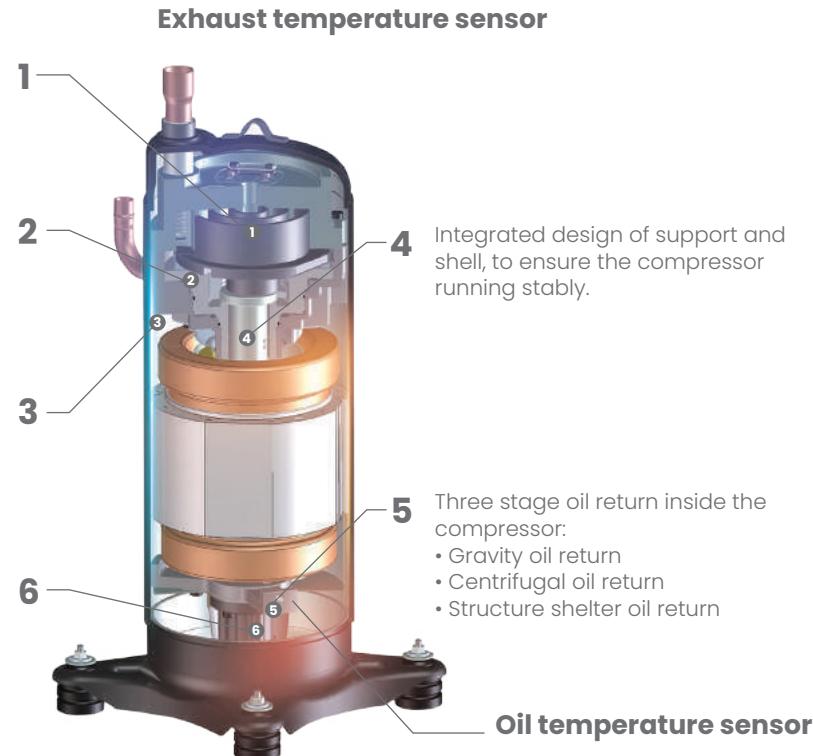

## Increased efficiency with full DC inverter compressor

Soft scroll plate design, compared with the common scroll plate, it reduce the leakage loss and mechanical loss, more efficiency.

The soft structure and overpressure protection of unloading valve, both of them can effectively reduce stress loss. The compressor is more stable and also efficiency.

We adopted High pressure chamber compressor, and low oil rate structure design, to ensure the reliable oil supply of the compressor, and lubricate all parts effectively.

Adopt new type oil cup design, reduce the disturbance of high speed rotation to oil level, also reduce the oil discharge, improve lubrication efficiency, reduce frictional loss.

Matches up inverter with stepless compressor, the durability and stability of the compressor are guaranteed, fault can be reduced.

Each compressor is adopted oil temperature sensor and the discharge temperature sensor, detecting the discharge temperature and oil temperature of compressor, cooperated with the compressor frequency and the EEV control, to ensure exhaust heat and oil temperature superheat kept within the optimal range. Ensure that the oil dilution is maintained at a safe level at all times.

## DC inverter stepless fan motor

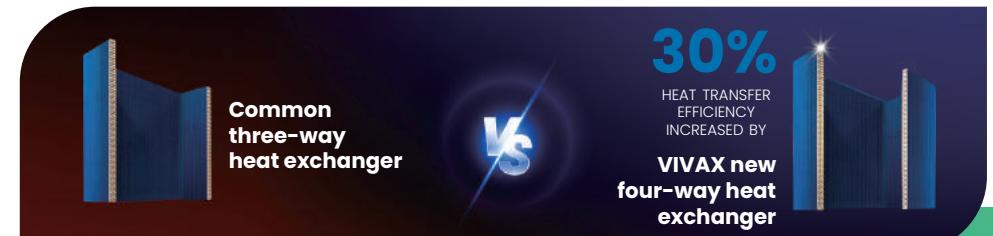

The outdoor fan motor has stepless inverter regulation technology and is able to operate in the 0-91 Hz frequency range which increases efficiency.stepless frequency.

## Temperature approaching technology

The main problem of an ordinary inverter VRF system lies in that its compressor starts and stops frequently, stopping when the room temperature reaches the setting temperature and restarting when the same becomes higher than the setting temperature. Though the inverter technology has improved such a problem greatly, the energy consumption caused by system restart is still a problem that cannot be ignored. VMV 5 series units adopts the temperature approaching technology, which enables the VRF system to maintain a low-frequency operating state all the time when the room temperature is close to the setting temperature but doesn't reach the setting temperature, thus avoiding the energy waste caused by frequent on / off.

## New four-way heat exchanger

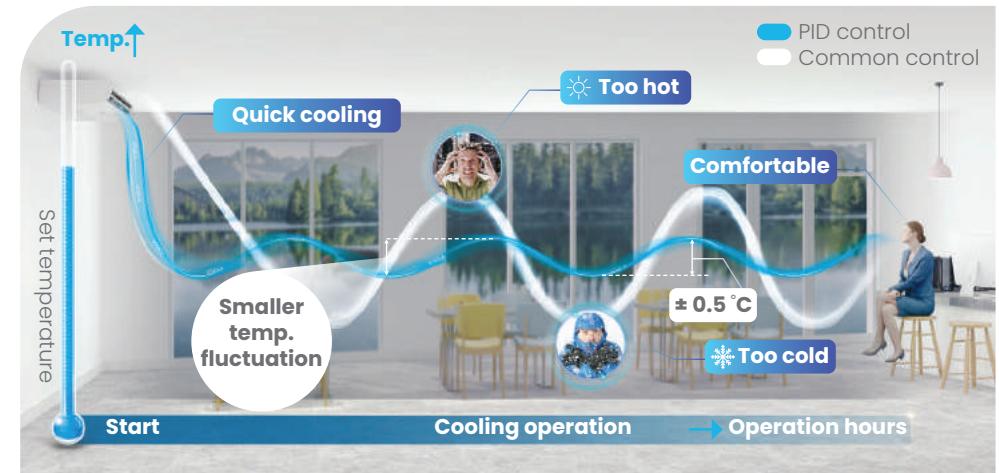

# High comfort

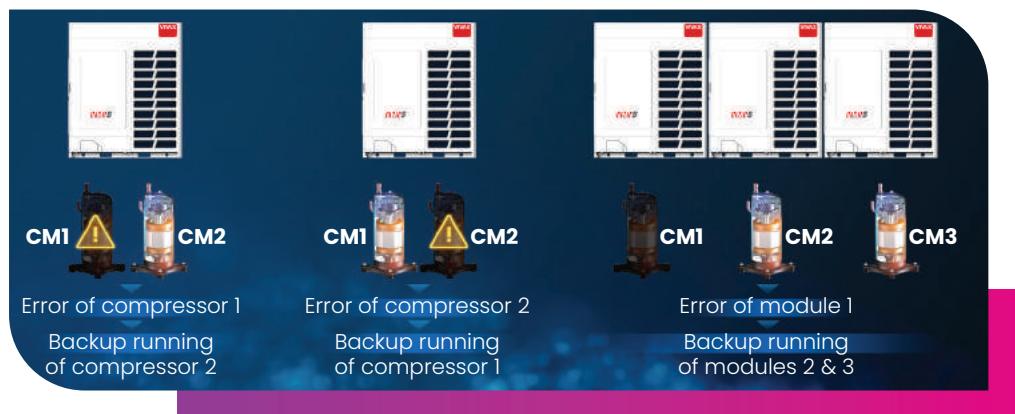

## Wide operation temperature range

The operation in heating and cooling are improved and temperature limits are -23 °C in heating and 50 °C in cooling.

## Precise temperature control

The VMV 5 units are equipped with double pressure sensors and double electronic expansion valves which enable the automatic refrigerant volume adjustment. With this technology indoor temperature could be controlled by 0.5 °C steps improving the comfort.

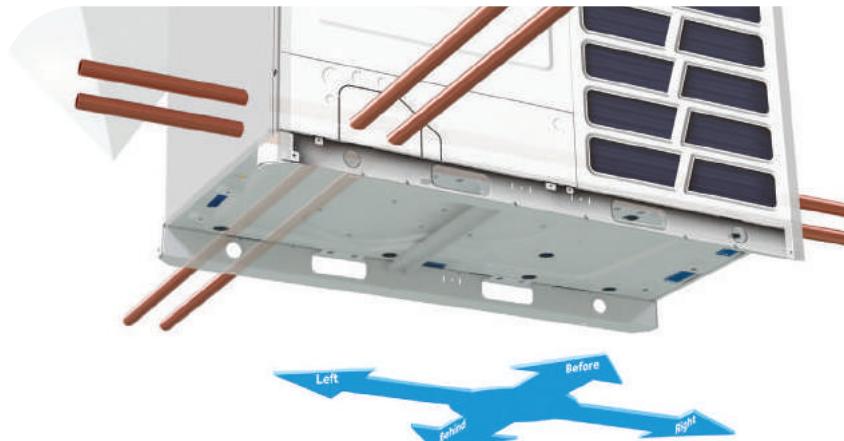

## Intelligent backup operation technology

In the case of a compressor malfunction another compressor (single outdoor unit with two compressors) or outdoor unit (multi module outdoor system) will enter in the backup operation. Units will continue to operate for 8 hours allowing the time for repair while providing the indoor comfort.

# Easy Installation

## Four-way refrigerant piping connection

Refrigerant pipes can be connected from four different directions which makes the piping installation simpler while saving time and material.

## 110 Pa external static pressure

External static pressure of outdoor unit air outlet can be set up to 110 Pa which allows multiple installation options.

Installation of duct

The outdoor unit is hidden inside the building without affecting the overall image of the building

## Auto addressing indoor units

The outdoor unit can automatically address the indoor units through the module on the PCB. It is more convenient and time saving as there is no need to manually set the addresses on each indoor units separately.

## Automatic oil balancing

In the multi module outdoor system the oil level in every module is balanced automatically. In such system there is no need for oil balancing pipes which simplifies the system design and improves reliability.

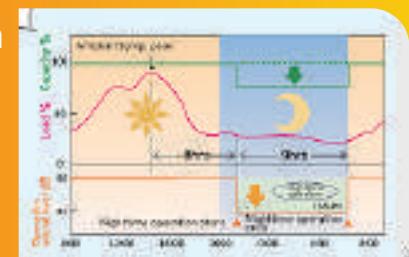

## Automatic snow and dust removal

The outdoor unit has the function of preventing snow accumulation on top of the unit. The dust can be blown away from the outdoor heat exchanger by reversing the operation of the fan.

## Night time low noise operation mode

It is possible to set the low noise operation mode which reduces the sound level by 10 dB(A). This function is useful when units are installed in residential areas, as well as in other noise-sensitive places.

	Sound pressure level (dB(A))	67.5	68	68	68	68	68	68

**3 / 380 ~ 415 / 50 / 60**

- Total pipe length 1000 m,  
height drop 110 m
- Auto addressing indoor units
- Space saving
- Better cooling capacity

Model		VMV-2590ARETA3	AV94IMVEVA	VMV-2655ARETA3	VMV-2720ARETA3	VMV-2775ARETA3	VMV-2830ARETA3	VMV-2885ARETA3
Installation	External dimensions - W/D/H (mm)			1410 / 750 / 1690 + 1410 / 750 / 1690 + 1410 / 750 / 1690				
	Shipping dimensions - W/D/H (mm)			1515 / 850 / 1858 + 1515 / 850 / 1858 + 1515 / 850 / 1858				
	Net / Shipping weight (kg)			370 / 400 + 370 / 400 + 370 / 400 + 370 / 400				
	Compressor type			DC INV. SCROLL				
	Compressor quantity	8INV	8INV	8INV	8INV	8INV	8INV	8INV
	Refrigerant type			R410A				
	Refrigerant charge (kg)	40	40	40	40	40	40	40
	Refrigerant liquid pipe (mm)	25.4	25.4	25.4	25.4	25.4	25.4	25.4
	Refrigerant gas pipe (mm)	50.8	50.8	50.8	54.1	54.1	54.1	54.1
	Max.total pipe lenth (m)			1000				
	Max. pipe length (Equivalent / Actual)			260 / 220				
	Max drop between I.U. & O.U. (O.U. down / up) *1 (m)			110 / 90				
	Standard drop between I.U. & O.U. (O.U. up / down) *2 (m)			50 / 40				
	Max drop between I.U. *3 (m)			30				
	Standard drop between I.U. *4 (m)			18				
	External static pressure (Pa)			110				
Connection ratio	Connectable indoor unit ratio (%)			50 ~ 130				
	Maximum number of indoor units	64	64	64	64	64	64	64
Working temp.	Cooling (°C)			-5 ~ 50				
	Heating (°C)			-23 ~ 21				

**Max drop between I.U. & O.U \*1** - If the height difference between the outdoor and the indoor units is from 50 to 110 m, contact your local distributor / dealer for individual design and production.

**Standard drop between I.U. & O.U \*2** - Standard design and production in the factory.

**Max drop between I.U. \*3** - If the height difference between the indoor units is from 18 to 30 m, contact your local distributor/dealer for individual design and production.

**Standard drop between I.U. \*4** - Standard design and production in the factory.

\* All the specifications are tested under nominal condition(in cooling, indoor temp. is 27 °C DB / 19 °C WB; Outdoor temp. 35 °C DB / 24 WB; in heating, indoor temp. is 20 °C DB, in heating, outdoor temp. is 7 °C DB / 6 °C WB).
